

Shambhala School Pre-Primary

The Shambhala School creates an environment that nurtures the health and stability of the young child. It is a warm, caring and creative environment that entices the child into a world of exploration and imagination.

Young children imitate and recreate all that goes on around them. Because of this, the beauty and harmony of the classroom strongly affect a child's sense of well-being and the ability to focus and relax.

Young children learn through imitating and imprinting with all of their senses. A skilled teacher fully engages this capacity through modeling the art and humour of language and the rhythms of music and mathematics.

The art of language is taught through beautiful, magical verses and movements.

A complete musical program is included daily with songs, movement, and rhythmic exercises. Mathematics is taught through counting games, rhythms, and verses.

The beauty of the French language comes alive through songs, games and activities. Specific fine and gross motor skills are developed through games and verses.

Each day, the teacher embarks on a journey with the children. Through the art of storytelling, the teacher fully ignites the child's imagination and imbeds the threads of love and respect for the natural environment and fellow human beings.

Shambhala School celebrates the joy and magic of childhood.
